Experiment - 1

Student Name: Naman Vrati   **UID:** 23BCT10010
Branch: AIT-CSE (BCT)   **Section/Group:** 23AIT-KRG -2A
Semester: 5th   **Date of Performance:** 28/07/25
Subject Name: ADBMS   **Subject Code:** 23CSP-333

Problem Statement (Easy)

Author-Book Relationship Using Joins and Basic SQL Operations.
Your task is to generate a report that maps employees to their respective managers, showing:
-   The employee's name and department
-   Their manager's name and department (if applicable)

This will help the HR department visualize the internal reporting hierarchy.

Code
(Attached as Exp 1 (Easy).sql)

Output

Book Name	Name	Country
The Lost City	Alice	Japan
Stars of the North	Frank	Canada
Sunset Serenade	David	Australia
The Jungle Mystery	Eve	Brazil
Code Breaker	Carla	Mexico
Silent Whispers	Alice	Japan
Ocean's Call	Bob	China
A Whale's Tale	Frank	Canada
